

Vaser Shape Pre Treatment Considerations

- Vaser Shape is contraindicated in patients with metal implants as well as any active implanted device. Vaser Shape is also contraindicated for women who are pregnant or lactating. Vaser Shape may not be as effective on clients with diabetes or thyroid disorders where the metabolic system is potentially impaired. Please be sure to share your complete medical history with us so we can make sure Vaser Shape is right for you.
- Please wear comfortable clothing on the day of your treatment so we can gain access to the treatment area and to avoid permanent stains from the treatment oil.
- No make-up, creams or lotions on skin; no jewelry. Skin should be hair free.
- Ideally, you should hydrate the day before, the day of and the day after your treatment as this will result in a more comfortable and efficacious treatment.
